Our innovative  **The Recyclable**  
*EnviroLiner* made of 100% recycled paper

We've changed the landscape...literally. When you choose our Recyclable EnviroLiner...you are ensuring that your company is getting a high-end label that stands out in the crowd yet is environmentally sustainable. That's good business.

Introducing the first liner made with 100% Recycled paper that is also Recyclable.

Customers have been asking for new products that are kinder to our environment, produce less waste, and have the same high quality they have come to expect from us.

We have listened and delivered with our patented EnviroLiner.

Current release liner is coated with a heavy coating of silicone to act as the release agent. Due to the high levels of silicone, liners have not been recyclable in local recycling facilities.

Thanks to our extensive research and development we now have the EnviroLiner which is made with 100% recycled paper and can be recycled in local recycling facilities.

Buying a label from us means you are part of a bigger solution.

*We are the only printer on the planet who offers a Recyclable EnviroLiner which is environmentally recyclable and made with 100% recycled paper.*

**Random Facts**

about Tattoos  
(may not be factual)  
To mix tattoo color, urine was used  
sometimes.  
Your skin is pierced 50 to 3000 times per  
minute by the tattoo machine when you  
get a tattoo.  
(safer to stick with a temporary tattoo ;)

## Random Fact

about Calendars

(may not be factual)

In ancient times, a month was calculated roughly by the length of time it takes the Moon to orbit Earth and begin a new phase. This occurs about every 29 and a half days. Although the length of a month now varies, the word month comes from the word "moon" (a "moonth")
